

Installation Workmanship Warranty

Z R Electrics stand behind our workmanship. We take a lot of care and attention to ensure each install consists of high-quality workmanship so you get optimal performance. That's why we are happy to offer a 10 Year Installation Workmanship Warranty – up there with the longest warranty periods.

An Installation Warranty is different from the warranty on the Solar Panel, Inverter or Mounting which only apply to the product's performance and manufacturing. The 10-Year Installation Warranty is our guarantee to you that if the solar system we installed fails or breaks within 10 years from the install date due to defective performance of our installation services, we will fix it or replace it.

Effectiveness

This warranty only comes into effect once we have received all amounts owing from you in relation to the solar system and title to the solar system has passed to you.

Installation Warranty Exclusions

The warranty will cease to apply when there is:

- Any improper use of the solar system, malicious damage, abuse, misuse, omission
- Failure to comply with manufacturer instructions and/or our instructions in relation to the operation and care of the solar system
- Damage is caused by vermin, animals, pests, 'Acts of God', weather events, accidents, power surges, land or building movement or any other acts beyond our reasonable control
- Normal wear and tear, corrosion, oxidization, discolouration occurs to any of the system
- Any work is done, beyond that listed on our Maintenance Checklist & Log Sheet in our Solar Owner's Guide, to the system and/or any of its parts (including modifying moving or relocating any part of the system) by anyone else other than us or an accredited installer authorized by us
- Failure to adhere to maintenance requirements as stipulated in Z R Electrics' Solar Owner's Manual
- Failure to promptly notify us of any issues or defects
- Repaired breaks or any damage caused due to works done by an unqualified, unskilled or inexperienced technician
- Issues arising from outside of our control, including but not limited to your existing electrical installation, wiring or fuse box, interferences from other devices, electricity distributor or network operator issues.
